SUMMARY

Data Science undergraduate with hands-on experience in building and delivering projects end-to-end. Able to break down a problem into clear steps and work towards a solution in a structured way. Comfortable working with data, tools, and teams. Eager to learn and adapt quickly to new environments.

SKILLS

Languages	Java, SQL
Backend	Django, Flask, REST APIs
Databases	MySQL, PostgreSQL, Firebase
Cloud	AWS (EC2, S3, Lambda – basics)
Tools	Git, GitHub, Postman, MS Excel, VS Code
AI/GenAI Tools	GitHub Copilot, Claude AI, OpenAI, Groq API, Streamlit
Soft Skills	Client Communication, Project Documentation, Cross-functional Collaboration
Other	Requirement Analysis, Testing & Validation, Presentation & Reporting

EDUCATION

B.Tech – Data Science, Woxsen University
CGPA: 8.54 / 10

2023 – 2027

EXPERIENCE

Infosys Springboard – Virtual Intern

Sep 2025 – Nov 2025

- Took full ownership of a web application project – from understanding what was needed to making it live and working.
- Handled all stages of the project: planning, building, testing, and final delivery – making sure quality was maintained at each step.
- Wrote clear documentation and shared regular progress updates, just like a consultant keeps stakeholders informed.

Cloud Computing Mentorship Program

Jun 2025 – Jul 2025

- Worked closely with mentors to plan and deliver a cloud-based application within the given timeline.
- Turned real business requirements into a working solution – tested it step by step to make sure it worked correctly.
- Took responsibility when problems came up and found solutions independently, without waiting for someone to guide every step.

PROJECTS

Pet Adoption Rescue Portal | Django, PostgreSQL, REST APIs

- Built a complete web application solo – handled everything from understanding requirements to final deployment.
- Created 20+ working features including user login, data forms, and role-based access – all tested and documented clearly.
- Organized the project in a structured way so it was easy to follow, review, and explain to others.

Air Writing Gesture Recognition | OpenCV, MediaPipe, Scikit-learn

- Designed a system that can recognize hand gestures in real time – translated a real-world use case into a working technical solution.
- Tested the system thoroughly and achieved 98–100

Cloud-Based Hotel Booking Chatbot | AWS Lambda, Amazon Lex V2

- Built an automated chatbot that takes hotel booking details from users and gives consistent, accurate responses every time.
- Designed the system to handle multiple users at once without slowing down – built on cloud to keep it reliable.

ADDITIONAL

- IIT Tirupati Hackathon Participant – built a real-world solution under tight time constraints.
- Vice President – Education, Street Cause Club (NGO) – planned and ran community programs, managing people and timelines.
- Industrial Visit – ISRO National Remote Sensing Centre (NRSC), Hyderabad.
